Hazard Ratings:	Health	Flammability	Reactivity
HMIS	0	1	0
NFPA	0	1	0

Immediate (Acute) Health Effects

Inhalation Toxicity: Because of its low volatility, exposure to vapors is unlikely and no significant adverse effects to health will occur from inhalation.
Inhalation Irritation: May cause transient irritation if inhaled as an aerosol.
Skin Contact: Contact would be expected to cause transient redness if not washed off and left on the skin for an extended period of time.
Skin Absorption: Not expected to be absorbed through the skin.
Eye Contact: Contact would be expected to cause transient redness if not washed out and left in the eye for an extended period of time. No visual impairment is expected.
Ingestion Irritation: Ingestion may cause irritation of the gastrointestinal tract and gastrointestinal discomfort with any or all of the following symptoms: nausea, vomiting, lethargy or diarrhea.
Ingestion Toxicity: Not expected to be toxic by ingestion unless large amounts are swallowed.

Prolonged (Chronic) Health Effects

Carcinogenicity: This product is not known or reported to be carcinogenic.
Reproductive and Developmental Toxicity: No reproductive or developmental risk to humans is expected from exposure to this product.

IV. FIRST AID

Inhalation: Remove individual to fresh air.
Skin / Eye: Remove contact lenses, if used. Flush with copious amount of water for 15 minutes.
Contact: Call a physician if irritation develops.

Ingestion: Immediately drink water to dilute. Never give anything by mouth to an unconscious person. Call a physician if symptoms develop.

EMERGENCY OVERVIEW

IMMEDIATE CONCERNS: Oxidizer. Contact with combustibles may cause fire. Decomposes yielding oxygen that supports combustion of organic matters and can cause overpressure if confined.

POTENTIAL HEALTH EFFECTS: Corrosive to eyes, nose, throat and lungs. May cause irreversible tissue damage to the eyes including blindness. May cause skin irritation.

IV. FIRST AID

Eyes:	Immediately flush with water for at least 15 minutes, lifting the upper and lower eyelids intermittently. See a medical doctor or ophthalmologist immediately.
Skin:	Wash with plenty of soap and water. Get medical attention if irritation occurs and persists.
Ingestion:	Rinse mouth with water. Dilute by giving 1 or 2 glasses of water. Do not induce vomiting. Never give anything by mouth to an unconscious person. See a medical doctor immediately.
Inhalation:	Remove to fresh air. If breathing difficulty or discomfort occurs and persists, contact a medical doctor.
Notes To Medical Doctor:	Hydrogen peroxide at these concentrations is a strong oxidant. Direct contact with the eye is likely to cause corneal damage especially if not washed immediately. Careful ophthalmologic evaluation is recommended and the possibility of local corticosteroid therapy should be considered. Because of the likelihood of corrosive effects on the gastrointestinal tract after ingestion, and the unlikelihood of systemic effects, attempts at evacuating the stomach via emesis induction or gastric lavage should be avoided. There is a remote possibility, however, that a nasogastric or orogastric tube may be required for the reduction of severe distension due to gas formation.

V. FIRE FIGHTING MEASURES

Flammability Summary (OSHA):	Product is known to be flammable, combustible or explosive.
<u>Flammable Properties</u>	
Flash Point:	N/A
Fire/Explosion Hazards:	Material may be ignited only if preheated to high temperatures, for example in a fire. Relative hazard is anticipated to be the same as typical combustible materials.
Extinguishing Media:	Use foam, carbon dioxide, dry chemical or water spray when fighting fires.
Fire Fighting Instructions:	In case of fire, use normal fire fighting equipment including a NIOSH approved self-contained breathing apparatus (SCBA). Use water to cool containers.
Hazardous Combustion Products:	Carbon Dioxide, Carbon Monoxide

VI. ACCIDENTAL RELEASE MEASURES

Release Notes: Dilute with a large volume of water and hold in a pond or diked area until hydrogen peroxide decomposes. Hydrogen peroxide may be decomposed by adding sodium metabisulfite or sodium sulfite after diluting to about 5%. Dispose according to methods outlined for waste disposal. Combustible materials exposed to hydrogen peroxide should be immediately submerged in or rinsed with large amounts of water to ensure that all hydrogen peroxide is removed. Residual hydrogen peroxide that is allowed to dry (upon evaporation hydrogen peroxide can concentrate) on organic materials such as paper, fabrics, cotton, leather, wood or other combustibles can cause the material to ignite and result in a fire.

VII. HANDLING AND STORAGE

HANDLING: Wear cup type chemical safety goggles and full-face shield, impervious clothing, such as rubber, PVC, etc., and rubber or neoprene gloves and shoes. Avoid cotton, wool and leather. Avoid excessive heat and contamination. Contamination may cause decomposition and generation of oxygen gas which could result in high pressures and possible container rupture. Hydrogen peroxide should be stored only in vented containers and transferred only in a prescribed manner (see FMC Technical Bulletins). Never return unused hydrogen peroxide to original container, empty drums should be triple rinsed with water before discarding. Utensils used for handling hydrogen peroxide should only be made of glass, stainless steel, aluminum or plastic.

STORAGE: Store drums in cool areas out of direct sunlight and away from combustibles. For bulk storage refer to FMC Technical Bulletins.

COMMENTS:

VENTILATION:

Provide mechanical general and/or local exhaust ventilation to prevent release of vapor or mist into the work environment.

VIII. EXPOSURE CONTROLS / PERSONAL PROTECTION

EXPOSURE LIMITS

<u>Chemical Name</u>	<u>TWA (ACGIH)</u>	<u>STEL/Ceiling (ACGIH)</u>	<u>PEL (OSHA)</u>	<u>STEL/Ceiling (OSHA)</u>
Hydrogen Peroxide	1 ppm		1 ppm	

Engineering controls: Ventilation should be provided to minimize the release of hydrogen peroxide vapors and mists into the work environment. Spills should be minimized or confined immediately to prevent release into the work area. Remove contaminated clothing immediately and wash before reuse.

PERSONAL PROTECTIVE EQUIPMENT

EYES AND FACE: Use cup type chemical goggles. Full face shield may be used.

RESPIRATORY: If concentrations in excess of 10 ppm are expected use approved self-contained breathing apparatus. Do not use oxidizable sorbants such as activated carbon.

PROTECTIVE CLOTHING: Liquid proof rubber or neoprene gloves. Rubber or neoprene footwear (avoid leather). Impervious clothing materials such as rubber, neoprene, nitrile or polyvinyl chloride (avoid cotton, wool and leather). Completely submerge hydrogen peroxide contaminated clothing or other materials in water prior to drying. Residual hydrogen peroxide, if allowed to dry on materials such as paper, fabrics, cotton, leather, wood or other combustibles can cause the material to ignite and result in a fire.

IX. PHYSICAL DATA

Odor	Odorless
PH	3.6 -3.9
Bulk Density:	Liter
Vapor Density	Heavier than air.
Evaporation Rate:	Slower than ether.
Specific Gravity:	1.0218

X. STABILITY AND REACTIVITY

Stability and Reactivity Summary:	Stable under normal conditions.
Incompatibility:	Reducing agents, combustible materials such as wood, cloth or organic materials, metals such as iron, copper and their alloys and dirt.
Hazardous Polymerization	Will not occur

XI. TOXICOLOGICAL INFORMATION

EYE EFFECTS:	Extremely irritating/corrosive (rabbit) (35% hydrogen peroxide) [FMC Study Number: I83-748]
SKIN EFFECTS:	Mildly irritating after 4 hours exposure (rabbit) (35% hydrogen peroxide) [FMC Study Number: I83-747]
DERMAL LD ₅₀ :	>2000 mg/kg (rabbit) (35% hydrogen peroxide) [FMC Study Number: I83-746]
ORAL LD ₅₀ :	=1193 mg/kg (rat) (35% hydrogen peroxide) [FMC Study Number: I83-745]
INHALATION LC ₅₀ :	>0.17 mg/L (rat) (50% hydrogen peroxide) [FMC Study Number: I89-1080]
TARGET ORGANS:	Eyes, nose, throat and lungs
ACUTE EFFECTS FROM OVEREXPOSURE:	Extremely irritating/corrosive to eyes and gastrointestinal tract. May cause irreversible tissue damage to the eyes including blindness. Inhalation of mist or vapors may be severely irritating to nose, throat and lungs. May cause skin irritation.
CHRONIC EFFECTS FROM OVEREXPOSURE:	There are reports of limited evidence of carcinogenicity of hydrogen peroxide to mice administered high concentrations in their drinking water (IARC Monograph 36, 1985). However, the International Agency For Research on Cancer concluded that hydrogen peroxide could not be classified as to its carcinogenicity to humans (Group III carcinogen).

INGESTION: If ingested, may cause nausea and vomiting. If in aerosol form, ingestion is not likely.

Section IV - FIRST AID

EYE CONTACT: If irritation or redness due to vapors develops, move victim away from exposure and into fresh air. If material gets into the eyes, flush eyes immediately with clean water for at least 15 minutes. If available, use eye-cups or eye wash fountain. If symptoms persist, get medical attention.

SKIN CONTACT: Clean affected areas with mild soap and water. Remove contaminated clothing, including shoes, and launder before reuse or discard.

INHALATION: If respiratory symptoms develop, move victim away from source of exposure and into fresh air. If symptoms persist, get medical attention. If victim is not breathing immediately begin artificial respiration. Get medical attention.

INGESTION: Product is not likely to be ingested. If this occurs, treat systematically. Never give fluids or induce vomiting if the victim is unconscious or having convulsions

SPILL ON LAND (LARGE SPILL): Eliminate sources of ignition. Prevent additional discharge of material, if possible to do so without risk. Minimize breathing of vapors. Minimize skin contact. Ventilate confined spaces. For small spills implement the following cleanup procedures: Prevent material from entering sewers, watercourses, or low areas. Contain spilled material with sand or earth. Do not use combustible materials such as sawdust. Observe precautions for volatile, combustible vapors from absorbed material. For large spills implement the preceding cleanup procedures and, if in public area, keep public away and advise authorities. Consult an expert on disposal of recovered material and ensure conformity to local disposal regulations.

SPILL ON WATER (LARGE SPILL): Eliminate sources of ignition. Warn occupants and shipping in surrounding and downwind areas of fire and explosion hazard and request all to stay clear. Remove from surface by skimming or scooping up floating material. Consult an expert on disposal of recovered material and ensure conformity to local disposal regulations.

SMALL SPILLS: Leaking containers should be placed in open containers, outdoors, away from any source of ignition, until all pressure has been released.

Skin Contact: Contact would be expected to cause transient redness if not washed off and left on the skin for an extended period of time.
Skin Absorption: Not expected to be absorbed through the skin.
Eye Contact: Contact would be expected to cause transient redness if not washed out and left in the eye for an extended period of time. No visual impairment is expected.
Ingestion Irritation: Ingestion may cause irritation of the gastrointestinal tract and gastrointestinal discomfort with any or all of the following symptoms: nausea, vomiting, lethargy or diarrhea.
Ingestion Toxicity: Not expected to be toxic by ingestion unless large amounts are swallowed.

Prolonged (Chronic) Health Effects

Carcinogenicity: This product is not known or reported to be carcinogenic.
Reproductive and Developmental Toxicity: No reproductive or developmental risk to humans is expected from exposure to this product.

IV. FIRST AID

Inhalation: Remove individual to fresh air.
Skin / Eye: Remove contact lenses, if used. Flush with copious amount of water for 15 minutes.
Contact: Call a physician if irritation develops.

INGESTION: If ingested, may cause nausea and vomiting. If in aerosol form, ingestion is not likely.

Section IV - FIRST AID

EYE CONTACT: If irritation or redness due to vapors develops, move victim away from exposure and into fresh air. If material gets into the eyes, flush eyes immediately with clean water for at least 15 minutes. If available, use eye-cups or eye wash fountain. If symptoms persist, get medical attention.

SKIN CONTACT: Clean affected areas with mild soap and water. Remove contaminated clothing, including shoes, and launder before reuse or discard.

INHALATION: If respiratory symptoms develop, move victim away from source of exposure and into fresh air. If symptoms persist, get medical attention. If victim is not breathing immediately begin artificial respiration. Get medical attention.

INGESTION: Product is not likely to be ingested. If this occurs, treat systematically. Never give fluids or induce vomiting if the victim is unconscious or having convulsions

Section VI - ACCIDENTIAL RELEASE MEASURES

SPILL ON LAND (LARGE SPILL): Eliminate sources of ignition. Prevent additional discharge of material, if possible to do so without risk. Minimize breathing of vapors. Minimize skin contact. Ventilate confined spaces. For small spills implement the following cleanup procedures: Prevent material from entering sewers, watercourses, or low areas. Contain spilled material with sand or earth. Do not use combustible materials such as sawdust. Observe precautions for volatile, combustible vapors from absorbed material. For large spills implement the preceding cleanup procedures and, if in public area, keep public away and advise authorities. Consult an expert on disposal of recovered material and ensure conformity to local disposal regulations.

SPILL ON WATER (LARGE SPILL): Eliminate sources of ignition. Warn occupants and shipping in surrounding and downwind areas of fire and explosion hazard and request all to stay clear. Remove from surface by skimming or scooping up floating material. Consult an expert on disposal of recovered material and ensure conformity to local disposal regulations.

SMALL SPILLS: Leaking containers should be placed in open containers, outdoors, away from any source of ignition, until all pressure has been released.

EMERGENCY OVERVIEW

IMMEDIATE CONCERNS: Oxidizer. Contact with combustibles may cause fire. Decomposes yielding oxygen that supports combustion of organic matters and can cause overpressure if confined.

POTENTIAL HEALTH EFFECTS: Corrosive to eyes, nose, throat and lungs. May cause irreversible tissue damage to the eyes including blindness. May cause skin irritation.

IV. FIRST AID

Eyes:	Immediately flush with water for at least 15 minutes, lifting the upper and lower eyelids intermittently. See a medical doctor or ophthalmologist immediately.
Skin:	Wash with plenty of soap and water. Get medical attention if irritation occurs and persists.
Ingestion:	Rinse mouth with water. Dilute by giving 1 or 2 glasses of water. Do not induce vomiting. Never give anything by mouth to an unconscious person. See a medical doctor immediately.
Inhalation:	Remove to fresh air. If breathing difficulty or discomfort occurs and persists, contact a medical doctor.
Notes To Medical Doctor:	Hydrogen peroxide at these concentrations is a strong oxidant. Direct contact with the eye is likely to cause corneal damage especially if not washed immediately. Careful ophthalmologic evaluation is recommended and the possibility of local corticosteroid therapy should be considered. Because of the likelihood of corrosive effects on the gastrointestinal tract after ingestion, and the unlikelihood of systemic effects, attempts at evacuating the stomach via emesis induction or gastric lavage should be avoided. There is a remote possibility, however, that a nasogastric or orogastric tube may be required for the reduction of severe distension due to gas formation.

V. FIRE FIGHTING MEASURES

Flammability Summary (OSHA):	Product is known to be flammable, combustible or explosive.
<u>Flammable Properties</u>	
Flash Point:	N/A
Fire/Explosion Hazards:	Material may be ignited only if preheated to high temperatures, for example in a fire. Relative hazard is anticipated to be the same as typical combustible materials.
Extinguishing Media:	Use foam, carbon dioxide, dry chemical or water spray when fighting fires.
Fire Fighting Instructions:	In case of fire, use normal fire fighting equipment including a NIOSH approved self-contained breathing apparatus (SCBA). Use water to cool containers.
Hazardous Combustion Products:	Carbon Dioxide, Carbon Monoxide

VI. ACCIDENTAL RELEASE MEASURES

Release Notes: Dilute with a large volume of water and hold in a pond or diked area until hydrogen peroxide decomposes. Hydrogen peroxide may be decomposed by adding sodium metabisulfite or sodium sulfite after diluting to about 5%. Dispose according to methods outlined for waste disposal. Combustible materials exposed to hydrogen peroxide should be immediately submerged in or rinsed with large amounts of water to ensure that all hydrogen peroxide is removed. Residual hydrogen peroxide that is allowed to dry (upon evaporation hydrogen peroxide can concentrate) on organic materials such as paper, fabrics, cotton, leather, wood or other combustibles can cause the material to ignite and result in a fire.

VII. HANDLING AND STORAGE

HANDLING: Wear cup type chemical safety goggles and full-face shield, impervious clothing, such as rubber, PVC, etc., and rubber or neoprene gloves and shoes. Avoid cotton, wool and leather. Avoid excessive heat and contamination. Contamination may cause decomposition and generation of oxygen gas which could result in high pressures and possible container rupture. Hydrogen peroxide should be stored only in vented containers and transferred only in a prescribed manner (see FMC Technical Bulletins). Never return unused hydrogen peroxide to original container, empty drums should be triple rinsed with water before discarding. Utensils used for handling hydrogen peroxide should only be made of glass, stainless steel, aluminum or plastic.

STORAGE: Store drums in cool areas out of direct sunlight and away from combustibles. For bulk storage refer to FMC Technical Bulletins.

COMMENTS:

VENTILATION:

Provide mechanical general and/or local exhaust ventilation to prevent release of vapor or mist into the work environment.

VIII. EXPOSURE CONTROLS / PERSONAL PROTECTION

EXPOSURE LIMITS

<u>Chemical Name</u>	<u>TWA (ACGIH)</u>	<u>STEL/Ceiling (ACGIH)</u>	<u>PEL (OSHA)</u>	<u>STEL/Ceiling (OSHA)</u>
Hydrogen Peroxide	1 ppm		1 ppm	

Engineering controls: Ventilation should be provided to minimize the release of hydrogen peroxide vapors and mists into the work environment. Spills should be minimized or confined immediately to prevent release into the work area. Remove contaminated clothing immediately and wash before reuse.

PERSONAL PROTECTIVE EQUIPMENT

EYES AND FACE: Use cup type chemical goggles. Full face shield may be used.

RESPIRATORY: If concentrations in excess of 10 ppm are expected use approved self-contained breathing apparatus. Do not use oxidizable sorbants such as activated carbon.

PROTECTIVE CLOTHING: Liquid proof rubber or neoprene gloves. Rubber or neoprene footwear (avoid leather). Impervious clothing materials such as rubber, neoprene, nitrile or polyvinyl chloride (avoid cotton, wool and leather). Completely submerge hydrogen peroxide contaminated clothing or other materials in water prior to drying. Residual hydrogen peroxide, if allowed to dry on materials such as paper, fabrics, cotton, leather, wood or other combustibles can cause the material to ignite and result in a fire.

IX. PHYSICAL DATA

Physical State:	Clear Liquid.
Odor	Odorless
PH	3.8 -4.0
Bulk Density:	Liter
Vapor Density	Heavier than air.
Evaporation Rate:	Slower than ether.

X. STABILITY AND REACTIVITY

Stability and Reactivity Summary:	Stable under normal conditions.
Incompatibility:	Reducing agents, combustible materials such as wood, cloth or organic materials, metals such as iron, copper and their alloys and dirt.
Hazardous Polymerization	Will not occur

XI. TOXICOLOGICAL INFORMATION

EYE EFFECTS:	Extremely irritating/corrosive (rabbit) (35% hydrogen peroxide) [FMC Study Number: I83-748]

ACUTE EFFECTS FROM OVEREXPOSURE:	Extremely irritating/corrosive to eyes and gastrointestinal tract. May cause irreversible tissue damage to the eyes including blindness. Inhalation of mist or vapors may be severely irritating to nose, throat and lungs. May cause skin irritation.
CHRONIC EFFECTS FROM OVEREXPOSURE:	There are reports of limited evidence of carcinogenicity of hydrogen peroxide to mice administered high concentrations in their drinking water (IARC Monograph 36, 1985). However, the International Agency For Research on Cancer concluded that hydrogen peroxide could not be classified as to its carcinogenicity to humans (Group III carcinogen).
